Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the fifth office action for U.S. Application 10/620,010 for a Toolless Locking Mount filed by Eric Thompson on July 15, 2003. Claims 9-11 and 13 have been canceled.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 15 recites the limitation "said object" in line 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12 and 14-17 are rejected under 35 U.S.C. 102b) as being anticipated by U.S. Patent 4,779,180 to Ruiz. Ruiz discloses the steps of inserting an article (4), rotating a top cap (5), overcoming resistance of a detent (9 pressed against 4), and lifting an article (4 can be lifted from the mounts). The step of overcoming the detent

Art Unit: 3632

includes compressing a spring (8), moving angled surfaces (at 90 degrees) of the base into contact with the object, tightening a screw (see figure 2 which shows the base attached by a screw). Claims 12 and 14-17 contain limitation to the structure of the mounts, but the limitations do not limit the method steps and therefore have no patentable significance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ruiz in view of Holden. Ruiz does not disclose engaging the article with polyurethane on inward surfaces to improve the grip. Holden et al. discloses polyurethane grips (248) on opposing arms for gripping an article. It would have been obvious to one of ordinary skill in the art at the time of the present invention to have provided polyurethane on the inward surfaces taught by Ruiz, as taught by Holden et al., for the purpose of improving the grip between the article and surfaces.

Allowable Subject Matter

Claims 1-8 are allowed. The following is an examiner's statement of reasons for allowance: The prior art does not disclose a universal mounting mechanism with a base

Art Unit: 3632

that has an upper surface and a bottom surface and a sideways face for engaging two non-parallel outside surfaces, the surfaces extending to the bottom surface, a top pivotally mounted on the base that lies on a plane orthogonal to the surfaces, the top locking into either a closed position over the face, or an open position clear of the face, and at least one fastener hole for receiving a fastener by which the base can be attached to an other surface with the bottom surface engaged with an upper surface of the other surface, whereby the object can be easily and quickly installed and removed from the other surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments with respect to claims 12 and 14-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Marsh whose telephone number is
